

# Slurry Separator Concrete Cleaner & Remover

## Environmentally friendly way to deal with slurry and wastewater

Our proprietary blend of clay minerals, polymers and pH adjusting agents cleans wastewater through flocculation, precipitation and pH adjustment.

### Benefits:

- Saves Money - Avoid the high cost of hauling/processing wastewater to be treated off-site
- Saves Time - Fast acting - entire process takes just a few minutes
- Meets guidelines for local, state and federal agencies
- Helps avoid long-term liabilities
- Streamlines operations - single application, treat on-site

### Separates water from:

- Emulsified oils
- Heavy metals
- Phosphates
- Suspended solids

Slurry Separator gives contractors a fast-acting, one-step process for separating slurry into water and sludge, for safe and cost efficient clean up and disposal. The entire process is completed in just a few minutes, resulting in clear water that can be discharged directly to a Publicly Owned Treatment Works (POTW) or recycled. The sludge, and its encapsulated contaminants, are highly resistant to leaching and can be generally disposed of as a non-hazardous waste.

Item
Slurry Sep. - 20 lb Box
Slurry Sep. - 50 lb Box
