CRETE CLEANER is a powerful alkaline degreasing cleaner designed for concrete surface preparation, concrete polishing, and resinous flooring installations. Formulated with citrus-based D-Limonene solvent and advanced surfactants, CRETE CLEANER rapidly penetrates and breaks down oil, grease, tire marks, adhesives, curing compounds, and other hydrocarbon contaminants commonly found on concrete floors.

CRETE CLEANER rinses easily with water, leaving the surface clean, residue-free, and ready for grinding, polishing, densification, or coating applications. Its low-foaming formulation makes it ideal for use with autoscrubbers, floor machines, pressure washers, and manual scrubbing methods.

CRETE CLEANER is a biodegradable, environmentally responsible alternative to harsh petroleum or chlorinated solvent cleaners commonly used in industrial environments.

KEY FEATURES & BENEFITS

- Citrus-enhanced degreasing power
- Breaks down oil, grease, tire marks, and hydrocarbons
- Helps remove adhesives, uncured polymers, and residues
- Ideal for concrete polishing and coating surface prep
- Low-foaming formula for autoscrubber use
- Rinses clean without leaving residue or film
- Biodegradable formula
- Safe for use on concrete and most metal equipment surfaces

TYPICAL APPLICATIONS

CRETE CLEANER is ideal for cleaning and degreasing:

- Concrete floors prior to grinding or polishing
- Surfaces prior to epoxy, urethane, or polyaspartic coatings
- Warehouse and manufacturing floors
- Auto shops and maintenance facilities
- Loading docks and industrial floors
- Equipment and machinery exposed to grease and oil

SURFACE COMPATIBILITY

- Concrete floors
- Industrial floors
- Most common metals
- Shop equipment and tools

Always test in a small area prior to full application.

APPLICATION INSTRUCTIONS

CRETE CLEANER can be used concentrated or diluted depending on contamination levels.

General Cleaning

Dilute 2–4 oz per gallon of water and apply using an autoscrubber, mop, or pump sprayer.

Heavy Oil or Grease Contamination

Apply stronger dilution and allow product to dwell before scrubbing.

Recommended Dilutions

SOIL LEVEL	DILUTION RATIO
Heavy Oil & Grease	2:1
Moderate Soil	8:1
Light Soil / Maintenance Cleaning	25:1

Application Steps

1. Sweep or vacuum loose debris from the floor.
2. Apply diluted CRETE CLEANER to the surface.
3. Allow 5–10 minutes dwell time to penetrate oils and contaminants.
4. Scrub using a floor machine, autoscrubber, or stiff bristle broom.
5. Rinse thoroughly with clean water or recover with an autoscrubber.
6. Allow surface to dry prior to grinding, polishing, or coating installation.

TECHNICAL DATA

PROPERTY	VALUE
Appearance	Yellow-green liquid
Odor	Citrus
pH (Concentrate)	12.0 – 12.5
Specific Gravity	1.05 – 1.10
Maximum Use Temperature	Up to 160°F
Foam	Low, controlled
Rinsing	Complete
Metal Safety	Inhibited for use on most soft metals

STORAGE

- Keep container tightly closed when not in use
- Protect from freezing
- Store in a cool, dry area

SAFETY INFORMATION

KEEP OUT OF REACH OF CHILDREN.

Avoid prolonged skin contact. Use appropriate personal protective equipment when handling chemical cleaners.

Refer to the **Safety Data Sheet (SDS)** for complete safety and handling information.
